EDUCATION

Bachelor of Technology (B.Tech) in Computer Science & Engineering

Cambridge Institute of Technology, Bangalore

August 2022 – June 2026

- CGPA: 8.6 / 10
- Key Courses: Data Structures, DBMS, Operating Systems, Web Development, OOP

Pre-University Course (PUC) – PCMB

Vidya Jyothi PU College, Kolar

June 2020 – April 2022

- Stream: Physics, Chemistry, Mathematics, Biology (PCMB)
- Percentage: 91.83%

Secondary School (Class 10)

Green Valley Public School, Kolar

june/july - 2020

- Percentage: 88.96%

PROJECTS

1. Real-Time Chat Application

Technologies: Flutter, Firebase, Dart (Mobile & Web)

- Built a real-time chat application using Flutter for cross-platform support (web and mobile).
- Integrated Firebase Authentication and Realtime Database for seamless messaging.

SKILLS

Technical Skills

- **Languages:** Java, JavaScript, Python, C, HTML, CSS
- **Frameworks & Libraries:** React, SvelteKit, Node.js, Flask, Tailwind CSS, WordPress
- **Database Technologies:** Firebase Realtime Database, MySQL, PostgreSQL
- **Tools & Platforms:** Git, GitHub, VS Code, Eclipse
- **Design & UI:** Figma
- **Key Concepts:** Object-Oriented Programming (OOP), Data Structures & Algorithms, API Integration

Soft Skills

- Problem Solving
- Communication
- Team Collaboration
- Time Management
- Adaptability

- Designed a responsive UI with support for chat history and user sign-in.

2. Secret Santa Game Application

Technologies: Java, Collections Framework

- Developed a Java-based console application to automate Secret Santa gift pairings.
- Ensured random, fair assignments with no self-assignments using Random and HashMap.
- Implemented OOP principles for clean, reusable code.

3. Bank Management System

Technologies: Java

- Created a console-based application to simulate basic banking operations like deposit, withdrawal, and balance check.
- Used classes, objects, and control statements to implement features.
- Practiced OOP, modular design, and user input handling.

4. Calculator Application

Technologies: Java (Swing)

- Built a basic GUI calculator for arithmetic operations using Java Swing.
- Implemented event-driven programming and responsive design.
- Practiced GUI layout management and exception handling.

5. Weather App

Technologies: JavaScript, HTML, CSS, OpenWeatherMap API

- Created a responsive web application to fetch and display real-time weather data.
- Showed temperature, humidity, and conditions based on user input city/location.

AWARD & Achievements

- **Completed Mini Project:**
Developed a **Real-Time Chat Application** using **Flutter** for both mobile and web platforms.
- **Java Mini Project:**
Built a **Secret Santa Gift Exchange** application using **Java** and the **Collections Framework**.
- **SAP Hackathon Participant:**
Participated in an SAP hackathon and contributed to a sustainability-focused project using SAP tools and technologies.
- **Samsung Innovation Campus – Python Certification:**
Successfully completed training and created a **Bank Management System** project as part of the certification program.

LANGUAGES

- **English** – Fluent
- **Kannada** – Native
- **Hindi** – Intermediate

- Practiced API integration and error handling.

6. Portfolio Website

Technologies: HTML, CSS, JavaScript

- Developed a personal portfolio site to showcase projects and skills.
- Implemented smooth scrolling, responsive layout, and a working contact form.
